

# Harris Weeks

DevOps - DevEx - Node - React

Portland, OR  
(404) 931 - 7724  
[jobs@hweeks.com](mailto:jobs@hweeks.com)  
they/them

## EXPERIENCE

### Zeal, San Francisco — Staff Engineer

4/21 - 12/21

Lead modernization of the packages on the frontend, moving to redux toolkit and using immer.js for state management assistance

Created an internal component library, powered by react storybook, that enabled a redo of all UI components to our latest figma design specs

Worked with design to define theming, components, and design/dev feedback cycle reduction, in the end we used gitpod.io to serve PRs to designers to approve them live

Added E2E test powered by playwright that relied on data-test-id props that were automatically exported by the components themselves, resulting in far less tech debt creation

### Adobe, Portland — Software Engineer 40

6/19 - 4/21

Rebuilt the 'spreadsheet' view using a virtualized table and proper pagination, reducing load and render times by a factor of 10 for our most commonly used UI

Led the rewriting and typing of the legacy codebase into the modern one, using allow js and other typescript features to allow for partial adoption, preventing a release delay from affecting product

Constantly pushed the level of excellence in the org via one on ones and constant learning and teaching in office hours for all new projects I led

### Intuit, Bay Area — Senior Engineer

9/16 - 11/17 && 3/18 - 5/19

Designed and built a design data service that exports design values. The admin panel was a k8s served React/express/graphql/mongodb app

Created bundling tooling and live code editors for internal React component library, implemented theming through styled components

Designed and built out the express server for qb.com, allowing easy internal extension along with tools for local dev and creation

## Previous:

Apple, Sunnyvale - Web Application Developer - 4/15 to 9/16

WebMD, Atlanta - Associate Web Developer - 10/14 to 3/15

## LINKS

## SKILLS

Web: HTML, CSS, SASS

JavaScript: Node (0.12 ->

LTS), Express,

styled-components, React, Redux

Testing: Jest, Puppeteer,

WDIO, Selenium, RTL,

Enzyme

Tooling: npm/yarn/yarn2,

TypeScript, webpack, babel,

eslint, stylelint, prettier

CI/CD: CircleCI, Jenkins BO,

semantic-release, renovate

Deployment: Docker,

docker-compose, argocd,

AWX, Ansible

Versioning: Git(Hub|Lab)

Practices: Agile, Kanban,

Waterfall
